

SEW LAB – REUSE, REMAKE, RESTYLE

Do you know a digitabulist from a haberdasher? No, we don't either, but that doesn't stop us from giving it a go!

This role will teach our residents basic (or not so basic) sewing and clothes making or repairing skills. This role will also support the Leederville Fabric project, a community bunting project that showcases community-made bunting at the Leederville Carnival in December.

Taking part in our weeknight or weekend class, you will help our residents work out how best to reuse, remake, or restyle their clothes and fabrics, helping to use more of what they buy and reduce waste.

To take part in this opportunity, you need to register on our website on the volunteering page, which you can find here <http://foyeroxford.org.au/get-involved/volunteering/registration-form>

Once you've done that, we can help you with your Working with Children Check (WWCC) application and do a National Police Clearance on your behalf. We will also talk about what days and times you want to get involved.

Where:

Foyer Oxford, 196 Oxford Street, Leederville,
WA 6007.

When:

A weeknight option and a weekend option –
exact times / days are negotiable.
